

# Measuring Guide for Horizontal Blinds

## Aluminum Blinds and Vinyl Blinds

### Tools and Tips

- **Steel tape measure** — do not use cloth tape
- **Pencil**
- **Measurement Worksheet** — See page 3
- **Measure each window** and identify window locations — size variances are common
- **Round measurements** to the nearest  $\frac{1}{8}$ "
- **Clearly record measurements** — width vs. height

*Double-check your work—always measure twice to ensure accuracy.*

## Choose a Mount Type: Inside Mount or Outside Mount

(See page 3 if you need help deciding which mount is best for your windows.)

### Inside Mount

Window treatments are installed inside the window casing.

**Inside Mount Blind**

**Depth**

**Width**

**Height**

**① Measure Depth:** See chart on page 3 to determine if window casing has enough depth for an inside mount window treatment.

**② Measure Width:** Measure the inside width of window casing in three places. Record narrowest measurement.

**③ Measure Height:** Measure the inside height from the bottom of the top window casing to top of sill in three places. Record longest measurement.

**Note:** Do not take any deductions for clearance. The manufacturer will take necessary deductions for a perfect fit.

### Outside Mount

Window treatments are installed outside the window casing. Mount directly to wall or molding.

**Outside Mount Blind**

**Width**

**Headrail Location**

**Height**

**① Measure Width:** Measure width to be covered. We recommend  $1\frac{1}{2}$ " overlap on each side of the window (3" total) for optimum light control and privacy. Record measurement.

**② Determine Headrail Location:** Determine if headrail will be on molding or above molding and mark spot.

**③ Measure Height:** Measure height to be covered from top of headrail location to top of sill or lower if overlap is desired for additional light control and privacy. Record measurement.

**Note:** The manufacturer makes **NO** deductions on **WIDTH** on outside mount installations.

## How To Measure Multiple Blinds On One Headrail

- ❶ Measure overall width of the area to be covered. If space permits, an overlap of 1½" per side is recommended for outside mounts.
- ❷ Measure the width of the area each blind is to cover. Measure and specify the left blind first, continuing to the right. Allow a minimum of ¼" between blinds for operating clearance. (⅜" minimum for cordless option; ½" minimum for NoHoles™ option on 2" vinyl)
- ❸ Total width of all blinds, plus clearance(s), must equal overall width.
- ❹ Measure height as follows:
  - a. For windows, use standard inside or outside measuring procedures.
  - b. For patio doors, measure height within ¾" of floor, either from ceiling or a point at least 6½" above the door frame.

## How to Order Multiple Blinds on One Headrail

- ❶ Specify total width of headrail.
- ❷ Indicate each panel width separately; specify left blind first, continuing to the right.
- ❸ Specify control positions.
- ❹ Add appropriate surcharge, if to the left of the solid line on the price chart.

**Example: Left Panel (49⅞") + Gap (¼") + Right Panel (49⅞") = Overall (100").**

# Mounting Considerations

## Reasons for Choosing Inside Mount

### Clean Look

- These treatments are installed inside the window casing, showcasing attractive window trim.
- The window opening frames the treatment for a finished, clean appearance.

### Allows Sill Space on Deep Windows

- In some deep-set windows, the window treatment can be installed to allow plants or other items to be placed in front of the window treatment on the sill.

## Limitations of Inside Mount

### Light Gaps

- A small deduction in the width and/or length is taken by the manufacturer to allow for proper operating clearance, and this causes a small amount of light to spill through on each side of the treatment, affecting the treatment's ability to darken a room.

### Obstructed View

- The stack (thickness of the window treatment when fully raised) will obstruct a part of the view from the window.
- The amount of stack varies by product.

### Architectural Obstacles

- Obstacles such as handles and cranks can interfere with the operation of inside mount treatments.

## Reasons for Choosing Outside Mount

### Improve Privacy and Light Control

- Light spilling through on the side of the window treatment can be substantially diminished or eliminated.

### Fewer Installation Limitations

- Ideal for covering windows that are not level.
- Because they are installed higher than the window opening, these treatments offer an unobstructed view when fully raised.

### Architectural Obstacles

- These window treatments can clear obstacles like handles and cranks.

### Enlarge the Look of a Small Window

- Increase overlap above and below or to each side of the window.

### Hide Window Trim

- These treatments can easily hide unattractive window trim.

## Limitations of Outside Mount

### Required Surface Above Window Frame

- Brackets require at least 2" of flat surface above window or on window frame for installation; Projection brackets can be ordered if needed to clear frame or molding.

## Inside Mount Window Casing Minimum Depth Requirements

<div><div><div><div><div></div><div></div></div><div><div><div></div><div></div></div></div><div><div><div><b>A. Flush Mount:</b> If the window casing is deep enough to mount the entire headrail inside of it, this is called a flush mount.</div><div><b>B. Partially Recessed:</b> A partially recessed window treatment is when the depth of the window casing is less than the space necessary for a flush mount.</div></div></div></div></div></div>	<div><div><div><div><div></div><div></div></div><div><div><div></div><div></div></div></div><div><div><div><b>A.</b></div><div></div></div><div>Depth needed for Flush Mount</div></div><div><div><div><div><div></div><div></div></div><div><div><div></div><div></div></div></div><div><div><div></div><div></div></div></div><div><div><div><b>B.</b></div><div></div></div><div>Depth needed for Partially Recessed</div></div></div></div></div><div>Depth needed for Flush Mount with Valance</div></div></div></div>
